

Symphony 'Storm' air cooler for large spaces

Symphony has introduced a new high-end cooler 'Storm' which will give cooling for larger spaces of up to 1000 square feet. Symphony Storm is the only domestic cooler in the world with a capacity to cool such a large

area. This tower cooler has an array of features like the patented PSR technology for low power consumption, high-efficiency cooling pads, full function remote, LCD display and a seven-speed option.
