May 29, 2020: Mr. Nrupesh Shah, Executive Director of Symphony Limited has commented:

- Symphony Limited launched for 2019-20 pathbreaking new models across the products in Residential, Commercial and Centralised air cooling segments. They are innovative in design, format and features. They have received overwhelming response.
- During March 2020 quarter the Company lost 15 to 17 % of the quarterly sales on account of COVID-19.
- The company released a campaign in late March and April to educate consumers about the health benefits of aircoolers over other forms of cooling, since aircoolers allow fresh air whereas other forms of cooling recirculate the same air which may bear infections. The company also launched a unique digital media campaign to promote online to offline sales. This campaign was a resounding success in terms of inquiries generated and could have resulted in significant sales were it not for the hurdles faced due to the lockdown. It nevertheless did result in good sales of channel inventory.

- Since May 18, wherever markets have opened, sales by the channel has been very robust aided by soaring temperatures and a delayed summer. The company is quite hopeful that if the present trend continues for a few more weeks, the channel inventory would be at acceptable levels by the end of summer.
- However, the company's sales in Q1 of FY 2020-21 has been severely impacted and will be a fraction of what it ordinarily would have been. But if the channel inventory is down to normal levels by the end of the quarter, which appears quite likely, it is expected that collections from next quarter onwards should be back at normal levels.

Outlook:

A. Symphony Standalone:

The demand has taken a hit in Q1 of FY 2020-21 due to nationwide lock down due to COVID-19 Pandemic. There are uncertainties about the performance in FY 2020-21. However, Company is quite confident and optimistic of its medium to long term prospects due to following factors:

1. Path Breaking Models
2. Continuous Innovation
3. Continuous Value Engineering
4. Market leader in Dealer and Distribution Network
5. Variety of Initiatives related to sales and marketing distribution
6. Pandemic could prove to be a blessing-in-disguise for Symphony going forward, as many customers who live in airconditioned homes and work in airconditioned offices are shifting to aircoolers
7. Aircooler, a plug-and-play product do not require installation unlike in the case of air-conditioners

B. Overseas Subsidiaries:

The Pandemic of COVID-19 has not materially impacted the business of subsidiaries companies particularly Climate Technologies, Australia and IMPCO, Mexico in April to June 2021 quarter so far. However, we are closely monitoring and tracking the situation and development.

ABOUT SYMPONY LIMITED:

A world leader in evaporative air coolers, Symphony focuses on innovative design to create better and eco-friendly products for domestic, commercial and industrial customers in 60 countries across the globe.
